Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1, 5 and 7 are rejected under 35 U.S.C. 102(e) as being anticipated by Manning (5,757,705).

Manning discloses a test circuit, comprising:

A first pin for receiving a first signal (a clock terminal);

A second pin for receiving a second signal (a clock enable terminal); and

A test signal generating circuit for generating a test signal in response to a logical combination (logic circuit) of the first and second signals. (See col. 7, lines 45-47 and lines 51-54).

3. Claims 2-4 and 6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten independent form including all of the limitations of the base claim and any intervening claims.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Phung M. Chung whose telephone number is (703) 305-9686. The examiner can normally be reached on T-F (every Monday Off).
